MILL LEVY SUMMARY FOR 1989-90

The following is a summary of the number of mills levied by school districts by county. The summary also contains the total taxable valuation of the school district and the taxable valuation per pupil. The taxable valuation per pupil is calculated by dividing the total taxable valuation by the number of children ages 6-17 reported on the 1987 school district census. The statewide average taxable valuation per pupil for the current school year is $8,039.

To determine the amount of revenue that a mill levy will raise, multiply the taxable valuation of the school district by the number of mills levied. (Example: taxable valuation $1,500,000 X .040 mills = $60,000.)

The type of General Fund levy is denoted by use of the following codes: P = percentage increase over 24 mills; S = specified maximum levy; U = unlimited mill levies; O = permissive levy of 24 mills or less. Of the total of 280 school districts, 108 districts have specified mill levies and 3 districts have unlimited levies. Twenty-four districts levied less than 70 mills for general fund purposes. Seven districts made no levy for general fund purposes. Six school districts did not make a levy for the 1989-90 school year. The total average levy for 1989-90 is 165.85 mills.

According to the data reported, 15 elections were held to establish specified maximum general fund mill levies during 1989. All of the 15 elections were successful. There were no bond elections during the 1989-90 school year.

The county and state totals were determined by totaling the taxable valuations for the school districts and calculating the number of mills required to raise the same amount of revenue if there were only a single county or state levy for each of the funds.

REPORT OF FUND GROUP 1 REVENUE AND EXPENDITURES AND AVERAGE COST PER PUPIL FOR 1988-89

The following report contains a summary of the revenue by source, total expenditures, the June 30, 1989 ending balance for Fund Group 1 and average cost per pupil. The column headed local/county revenue contains revenue from county sources including dollars from mineral severance and conversion taxes. The total revenue column may be greater than the total revenue for local, state and federal sources because revenue from other sources was not listed separately but was included in the total revenue column. The average cost per pupil is computed by dividing the reported costs for instruction, administration, and operation and maintenance of plant for each of the grade levels by the appropriate average daily membership. The value in the last column is the percent the ending balance was of the total Fund Group 1 expenditures.

EXPENDITURE CALCULATION OF AVERAGE COST PER PUPIL FOR 1988-89

The cost of education (instruction) is calculated by adding the general and special fund expenditures for regular instructional programs for pre-kindergarten through grade 12, special education programs, vocational programs, federal programs, administration, and operation and maintenance. The total expenditures for the above functions are then divided by the average daily membership to determine the average cost per pupil.

The total expenditures for the above functions were then divided by the average daily membership to determine the average cost per pupil. The average cost for 1988-89 was as follows: kindergarten, $1,542.00; grades 1-6, $3,075.67; grades 7-8, $3,307.32; grades 1-8, $3,129.37; grades K-8, $2,939.20; grades 9-12, $3,838.24; and all pupils, $3,213.20. The rank order of school districts by average cost per pupil is presented in the following tables.
